

**East Central Soil & Crop Improvement Association Tier 2 Project
September 18,19,20 tours**

Soil pits: Daniel Saurette, Land Resource Specialist, OMAFRA explains the soil profile development
Burnham Farms, Port Hope
Deep with 3 (+ sub) horizons

White Feather Farms, Port Perry
Shallower with 3 horizons

GellBrae Farms, Keene
Shallow with 2 horizons

Interseeder used by Matt Porter

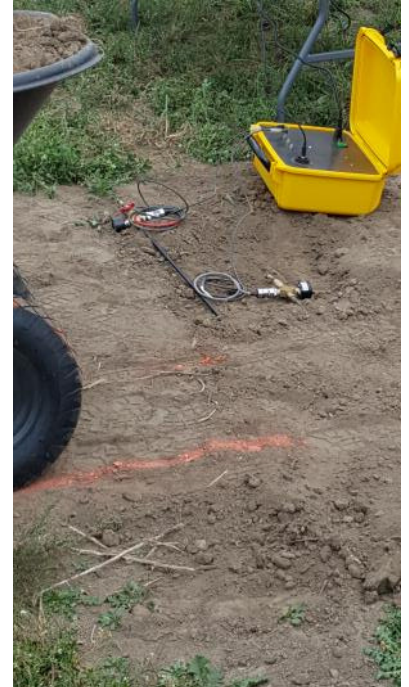

planted into corn mid June

planted in bare ground

Tier 2 project continued

Ian McDonald OMAFRA showing the compaction issue and a solution. A demonstration using a wheelbarrow with 2 tires— one high pressure and one low pressure pushed over sensors in the ground. Low pressure tire had less response on the monitor.
